Business Profile & Objectives

PART I.A: BUSINESS CONTEXT

ENGAGEMENT PARAMETER	CLIENT SPECIFICATION
Engagement Description	**DORA-compliant Threat-Led Penetration Testing (TLPT) of core banking systems.**
Primary Deliverable	**Formal TLPT Red Team Execution Log and Remediation Plan.**

1.5 Regulatory Alignment: DORA Bank Resilience

Narrative: DORA resilience and TLPT-ready scoping for critical ICT systems, functions, and third-party ICT dependencies.

REGULATORY BODY — **Digital Operational Resilience Act (DORA) (European Union)**

ARTICLE/REF	TITLE	REQUIREMENT	SCOPING GUIDANCE
Article 24	General Control Testing	ICT resilience testing programme.	Critical ICT systems.
Article 26	TLPT	Threat-led penetration testing.	Every 3 years for critical entities.

Mandatory Evidence Artifacts:

Asset Register | Threat Scenarios | TI Plan | Remediation Plan

IMPLEMENTATION GUIDANCE — **DORA**

ICT Asset Criticality Mapping

Under DORA, scoping must start with the ICT Asset Register. Every asset in scope must be mapped to a 'Critical or Important Function' (CIF). If an asset supports a CIF, it is subject to more rigorous testing and reporting requirements.

Third-Party ICT Risk

DORA requires that testing includes third-party ICT service providers where they support critical or important functions. This scoping pack must include a list of involved third parties and confirmation of their authorization to test.

Threat Intelligence Requirements

For TLPT (Threat-Led Penetration Testing), the scope must be driven by current, relevant threat intelligence. The scenarios defined in this pack should match the TTPs of actors targeting the financial sector.

IMPLEMENTATION GUIDANCE

MITRE

T1190 - Exploit Public-Facing Application

Adversaries may attempt to take advantage of a weakness in an Internet-facing computer or program using software, data, or commands in order to cause unintended or unanticipated behavior.

T1078 - Valid Accounts

Adversaries may obtain and abuse credentials of existing accounts as a means of gaining Initial Access, Persistence, Privilege Escalation, or Defense Evasion.

T1566 - Phishing

Adversaries may send phishing messages to gain access to victim systems. All forms of phishing are electronically delivered social engineering.

T1059 - Command and Scripting Interpreter

Adversaries may abuse command and script interpreters to execute commands, scripts, or binaries.

IMPLEMENTATION GUIDANCE

OWASP

A01:2021-Broken Access Control

Testing must validate that users cannot act outside of their intended permissions. Failures typically lead to unauthorized information disclosure, modification, or destruction of all data.

A02:2021-Cryptographic Failures

Testing must verify the protection of sensitive data in transit and at rest. This includes passwords, credit card numbers, health records, personal information, and business secrets.

A03:2021-Injection

Testing must validate that user-supplied data is not interpreted as commands or queries (e.g., SQL, NoSQL, OS command, ORM, LDAP, and EL expression or OGNL injection).

A04:2021-Insecure Design

Testing must evaluate the architectural design for missing or ineffective control design. Insecure design cannot be fixed by a perfect implementation.

Control 1: Inventory and Control of Enterprise Assets

Actively manage (inventory, track, and correct) all enterprise assets connected to the infrastructure physically, virtually, remotely, and those within cloud environments.

Control 4: Secure Configuration of Enterprise Assets and Software

Establish and maintain the secure configuration of enterprise assets and software.

Control 12: Network Infrastructure Management

Establish, implement, and actively manage network devices, in order to prevent attackers from exploiting vulnerable network services and access points.

Threat Scenarios & Modeling

PART I.C: THREAT INTELLIGENCE

Threat Intelligence Profiles

The following threat actors and attack scenarios have been selected to drive the execution methodology.

THREAT ACTOR	MOTIVATION	TARGET OBJECTIVE	PRIMARY TTPS
APT29 (Cozy Bear)	Espionage and data theft	Exfiltrate customer PII from the core banking database	Spearphishing, Living off the Land, Custom Malware
FIN7	Financial Gain	Compromise SWIFT payment gateways	Supply chain compromise, Ransomware deployment

2.1 Digital Chain of Evidence

Artifacts produced during this engagement follow a cryptographically-verifiable lifecycle.

LIFECYCLE PHASE	VALIDATION METHOD
Acquisition	SHA-256 Verified Capture
Processing	Air-Gapped Analysis Environment
Destruction	NIST 800-88 Compliant Wipe

2.2 Data Sovereignty & Residency

To adhere to regulatory data protection requirements, the following residency rules apply to all engagement artifacts.

FRAMEWORK	RESIDENCY MANDATE
DORA	Must remain strictly within EU boundaries or approved adequate jurisdictions. Cloud storage requires EU-based tenants.

2.3 Regulator Audit & Access Rights

The following audit rights and access privileges are contractually granted to the respective regulatory bodies.

REGULATOR	ACCESS RIGHTS
DORA	European Supervisory Authorities (ESAs) must have full and unrestricted access to threat-led penetration testing results.

Target Scope & Access Readiness

PART II.C: TARGET SCOPE

STRICTLY CONFIDENTIAL // STRATEGIC SCOPE

Core Target Register

The following assets are explicitly in-scope for this engagement.

ID	TARGET / GROUP	TYPE	ENVIRONMENT	OWNER
TGT-001	api.nexus-bank.com	API Gateway	Production	Platform Team
TGT-002	10.50.0.0/16	Internal Network Range	Corporate	IT Infrastructure

Access & Test Data Readiness

Required access and data prerequisites.

PREREQUISITE	DESCRIPTION / STATUS
VPN Access	Client to provide OpenVPN profiles for two consultants.

Third-Party ICT Supply Chain Scope

PART II.D: THIRD-PARTY RISK

Third-Party ICT Dependency Register

The following third-party service providers (Cloud, SaaS, MSPs) host or manage in-scope assets and require explicit authorization.

PROVIDER	SERVICE TYPE	ASSETS HOSTED	AUTHORIZATION STATUS
AWS	Cloud Infrastructure	EKS Clusters, RDS Databases	Authorized (AWS Acceptable Use)
Okta	Identity Provider	Corporate SSO	Pending Notification

Technical Scope of Work

PART III: EXECUTION

RT-COVERT

Covert Red Team Execution

Intelligence-led, objective-based penetration testing executing the scenarios defined in the TI-PHASE. Includes stealth, evasion, and assumed-breach scenarios against core financial systems.

1 Days | €0 Budgetary ALLOC

Omni Control Matrix

3.1 Omni Control Mapping

The following granular controls are in scope for the selected execution modules.

CONTROL ID	CONTROL NAME	FRAMEWORK	REFERENCE	IMPACT
CB_01	Core Banking Network Segmentation	DORA	Art 24	Critical
SW_02	SWIFT Gateway Isolation	CBEST	Objective A	Critical
IAM_03	Privileged Access Monitoring (PAM)	FRB	SR 13-1	High
TI_04	Threat-Led Defense Posture	iCAST	CFI-2	High
IR_05	Active Incident Response Capabilities	DORA	Art 26	Medium

RACI Governance

3.2 RACI Governance Matrix

Responsibility Assignment Matrix for engagement activities.

ACTIVITY	THREAT INTEL PROVIDER	RED TEAM LEAD	CLIENT SECURITY OPS	CLIENT EXEC SPONSOR
Targeted Threat Intelligence Gathering	**I**	**R**	**C**	**A**
Regulator & Scope Notification	**I**	**C**	**A**	**R**
Covert Red Team Execution	**R**	**C**	**I**	**I**
Purple Team Replay Exercises	**R**	**I**	**C**	**A**
Regulator Artifact Submission	**C**	**I**	**R**	**A**

Regulatory Deliverables Schedule

Regulatory Deliverables Schedule

The following reports and evidence logs are contractually required to satisfy the loaded regulatory frameworks.

REGULATORY BODY	MANDATORY DELIVERABLE ARTIFACT
Digital Operational Resilience Act (DORA)	Asset Register
Digital Operational Resilience Act (DORA)	Threat Scenarios
Digital Operational Resilience Act (DORA)	TI Plan
Digital Operational Resilience Act (DORA)	Remediation Plan

Quality Assurance & Peer Review

PART IV.B: QUALITY ASSURANCE

Formal Quality Assurance Gate

Based on the selected regulatory frameworks and execution modules, the following QA routing is algorithmically enforced.

REQUIRED QA LEVEL: TLPT Qualified Red Team Reviewer

Mandatory Threat-Led Penetration Testing (TLPT) review gate. Evidence and kill-chain paths must be validated by a certified Red Team peer reviewer before report release.

Verification & Sign-off

PART V: AUTHORIZATION

NEXUS SEAL
